

Compliant with the FHWA's MUTCD and the Ministère des Transports (M.T.Q.) T-RV-3 standard, the Enviro-cone™ stands out for its remarkable field performance and eco-friendly design. In fact, it is made of recycled and recyclable materials, including rubber for the base and reformable fluorescent orange LDPE that is resistant to extreme weather conditions for the cone itself. It is also possible to replace only one of the two parts in case one of them cannot be reused thanks to its modular assembly. Equipped with an ergonomic grip at the tip and wide strips of reflective film, the Enviro-cone™ is easily set up and is easily visible day or night. The 80% weight distribution towards the base (up to 76° of possible tilt), provides exceptional stability which allows the Enviro-cone™ to stay securely in place at all times.

### Technical Informations

Product N°:	T-RV-3-28-ENV
Dimensions	
Height:	700 mm (28")
Base:	400 x 400 mm (15,75 x 15,75")
Weight (w/ stabilizer):	3,2 kg (7 lbs.)
Upper reflective strip:	152 mm (6")
Lower reflective strip:	102 mm (4")
Materials	
Cone:	Recycled LDPE with UV protection
Sheeting:	High Intensity Grade – Type IV
Stabilizer:	Recycled rubber
Available Colours:	
Cone:	Orange, Green
Sheeting:	White
Stabilizer:	Black

- Includes a handle for easy handling
- Inlaid reflective strips
- Very high stability
